QUALITY PIGMENTS

COMPANY PROFILE

ABOUT MEGHNA

Started with manufacturing a few inorganic color pigments with now established as one of the leading Color Pigment Producer manufacturers based in India. We have closely worked with and have had technology transfers from some of the leading Swiss multinationals in the industry, our decades of experience and collaborations with some of the top industry leaders makes us a trusted partner for various range of color pigments be it for Paints, Coatings, Inks and Plastic coloration.

MEGHNA operates with 3 manufacturing units all located in Gujarat, India in and about 200 kms. from Mumbai, India. Our production facilities are fully equipped with 3 lab's and a R&D centre which is focused in further optimising performance of the current pigments produced and developing tailor made pigments on customer requests.

We offer our customers a wide portfolio of Color Pigments which includes Phthalocyanine Blues and greens, Activated CPC blues, Anti-corrosive pigments, Azo pigments, and inorganic chrome pigments with an excellent performance in various applications like plastic coloration, Paints, Coatings and Inks.

COMPANY FACTS AND FIGURE

PRODUCTION CAPACITY

15,600 METRIC TONS OF PIGMENTS

Under expansion to bringing in new Mega facility for Organic and Inorganic Pigments

- + Unit 1 | 4800 tons , Vapi India
- + Unit 2 | 7200 tons , Vapi India
- + Unit 3 | 960 tons , Vapi India
- + Unit 4 (Upcoming soon)

PRODUCTION RANGE

- + Phthalocyanine CPC Blues and Activated CPC
- + Phthalocyanine Blue and Green pigments
- + Azo pigments
- + Anti-corrosive pigments
- + Chrome yellow 34's and Moly red 104's

JOURNEY OF MEGHNA COLOUR CHEM GROUP

RANGE OF COLOR PIGMENTS...

Meghna Colour Chem's is producing and developing high-quality inorganic & Organic pigments majorly for Paints, Coatings, Plastics coloration and Printing Inks.

Our pigments tend to offer excellent properties according to the application fields. Our shade matching team and R&D also provides tailor made pigments according to the customer needs.

ORGANIC PIGMENTS

Organic pigments are based on carbon chains and rings, these exhibits excellent fastness properties to weather, light, solvent, heat etc. MCC is indulged in developing and producing some of the major organic pigments which gives excellent performance in Plastic coloration, Inks, Paints and Coatings and other color applications.

PHTHALOCYANINE BLUES

Meghna Colours produces high quality Phthlo blues and greens, Activated Cpc blue and Cpc blue for a wide range of applications ranging for high performing inks, paints and plastics.

Under Brands : MEGLAZE™ MEGPLAZZ™ MEGINKS™

CLASSICAL AZO PIGMENTS

Historically known as one of the first synthetic organic pigment range we at Meghna Colours are producing these wide range of reds and yellow pigments for various applications offering excellent properties

Under Brands : MEGLAZE™ MEGPLAZZ™ MEGINKS™

INORGANIC PIGMENTS

Inorganic pigments are not based on carbon chains and rings. Instead, they consist of **dry ground minerals, usually metals and metallic salts**. Because of their composition, inorganic pigments are usually more opaque and more insoluble than organic pigments.

ANTI-CORROSIVE PIGMENTS

Worldwide corrosion destroys tons of steel every second. Our developed range of anti-corrosive pigments helps in saving your huge investments from corrosion and extending their work life.

Under MCC Brand : MEGCORR™

CHROME YELLOWS AND MOLYBDATE RED (PY 34'S & PR 104'S)

One of the strongest yellow and red pigments which gives good color shade, light fastness and good heat stability. Meghna Colours is producing these pigments with layers of silica to control the lead content in these products and making them environmentally viable, these pigments are meant for industrial applications, Road Marking paints and other plastic applications where there is less human contact.

APPLICATIONS FIELDS

| **Plastics**

MEGPLAZZ™

A photograph showing rows of orange stadium seats in a large arena, with some green seats visible in the background.

| **Paints**

MEGLAZE™

A close-up photograph of several open paint cans in various colors including red, orange, green, and blue, arranged in a grid.

| **Inks**

MEGINKS™

A photograph showing a thick stream of red ink being poured from a container, creating a dynamic, flowing shape against a blurred background.

| **Coatings**

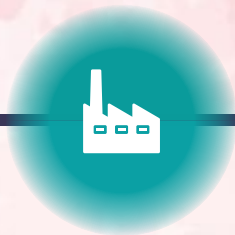

MEGCORR™

A photograph of a wind farm with several white wind turbines standing in a green, rolling landscape under a clear sky.
